

# X-Zelit awarded with Gold Medal

**In February 2013 Vilofoss Polska took part in XIII International Cattle Farm Fair and XVI International Pig & Poultry Farm Fair, held in Łódź, Poland.**

The two events were combined, giving the exhibitors an opportunity for joint presentation of the best offers for the cattle, pig and poultry breeding sector.

There were 220 exhibitors from Poland and abroad, presenting their products on a total of 9000 m2 exhibition space. The fair generated a lot of interest among the visitors, about 28 thousand of whom came to Łódź this year. They could learn about a wide range of zootechnical articles, fodder and feed additives, veterinary products, breeding material, feed wagons and other livestock building equipment. Apart from this, one could attend many interesting scientific conferences and numerous lectures.

The Polish Minister of Agriculture and Rural Development was also a guest of the exhibition. During an open meeting the minister answered questions concerning the future of agriculture in the perspective of 2014-2020.

There was a competition conducted at the fair, during which enterprises were awarded and distinguished in two categories: "Gold Medal" for the best product and "New Sign" for the newest product on the market. Vilofoss Polska put up X-Zelit to the competition. The product was evaluated by the commission of Polish scientists and experts, who unanimously awarded it the Gold Medal for providing a perfect calcium balance around calving and minimizing the risk of hypocalcaemia.
